## **WEATHER SYNOPSIS BY REGION**

#### **NORTHERN CALIFORNIA**

\*\*\* Dry, warm weather returning; Fuels drying as well \*\*\*

High pressure will be taking over the Northern California weather pattern this week with much warmer drier conditions prevailing. Recent wet weather will add some to soil moisture content but also encourage annual vegetation to continue growing some as it warms up this week. High temperature will reach into the mid and upper 80s warmest inland areas mid and later this week to be on the order of 10 degrees above seasonal normals there. Areas of gusty northerly winds are expected mainly near the coast and northern half of Northern California for the next few days, gusts mostly topping out at 25-30 mph in the windiest locations.

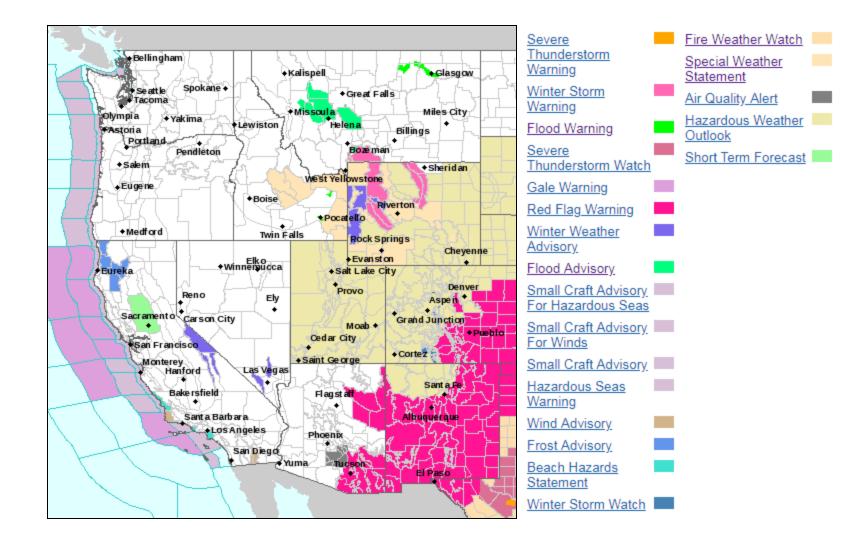

Not a lot of change is expected through the weekend with dry and unseasonably warm weather appearing likely to continue.

#### **SOUTHERN CALIFORNIA**

An area of low pressure currently over the Pacific Northwest will drop quickly south and be over Southern California Tuesday and then it will move east into Arizona Wednesday. Scattered showers and isolated thunderstorms will develop over the Sierra and over Southern California tonight through Wednesday afternoon. Most locations will receive less than a half inch of rainfall. The snow level will be around 7,000 feet. Westerly winds of 20 to 40 mph with gusts to 60 mph will surface across the mountain ridges and desert passes this afternoon through Tuesday evening. Temperatures will be well below normal through Wednesday, with upper 40s and 50s across the mountains and 60s to low 70s in the valleys. A ridge of high pressure will build into the West Coast from the Pacific Ocean bringing a significant warming and drying trend to the region Thursday through Saturday. Temperatures will reach the low 90s in the valley locations and minimum humidity will be mainly in the teens Friday and Saturday. Light offshore flow will occur Thursday morning through Saturday morning. An area of low pressure will form over the Pacific Northwest and drop slowly southward bringing a cooling trend along with an increase in humidity starting Sunday.

## **WEATHER MAP**

## **Cal OES LAW ENFORCEMENT MISSIONS**

## **Cal OES Law Missions**

Nothing significant to report.

## **Cal OES MISSION TASKING**

#### **Cal OES Missions**

- **2018-LAW-45645:** Tactical Communications staff and reserves providing communications support to mission with radios, satellite, and staff for the Big Sur International Marathon 04/27/18-04/29/18. (Mission Closed)
